

I oppose the the Low Power FM expansion that would give them priority over my favorite radio station in Livermore, California, K-Love. I can not find any other station in my area that offers the combination of contemporary Christian music and features that is offered by K-Love. I believe this station offers a unique programming combination that is an important part of my daily life and will be very disappointed if the FCC were to take away the rights to this frequency from KLOVE. I believe this radio station is in the public service as it promotes family values and offers a station that our entire family can listen too. Please do not allow some other station to take away this service to my family.  
Best Regards,  
Martin Fitch
